

PRATIGYA SINGH

Data Analyst & Python Developer

pratigyasingh085@gmail.com | +91 83192 91980 | github.com/pratigya0 | linkedin.com/in/pratigya-singh-rajput-8713801ba

PROFESSIONAL SUMMARY

Detail-oriented **Data Analyst and Python Developer** with hands-on experience in end-to-end AI application development, data pipeline design, and real-time computer vision systems. Skilled in Python, SQL, and ML frameworks with exposure to CRM analytics platforms (Google Analytics, Looker Studio, Salesforce Marketing Cloud). Adept at translating complex data into actionable insights to support data-driven decision-making.

TECHNICAL SKILLS

Languages:	Python, SQL
Data & Analytics:	Pandas, NumPy, Matplotlib, Looker Studio, Google Analytics, Google Tag Manager
ML / AI Frameworks:	TensorFlow, Scikit-learn, YOLO, OpenCV (LangChain – learning)
AI Concepts:	Machine Learning, NLP, Neural Networks, CNNs, Representation Learning, QCNNs
CRM & Marketing:	Salesforce Marketing Cloud (SFMC), MoEngage
Other Tools:	Git, Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE

Data Analyst Intern – Publicis Groupe

Jul 2025 – Sep 2025

On-site | Bhopal, India

- Built and maintained analytics dashboards in **Looker Studio** integrating data from multiple marketing sources, enabling data-driven campaign decisions.
- Configured and managed **Google Analytics** and **Google Tag Manager** tracking setups for production web properties.
- Worked with **Salesforce Marketing Cloud (SFMC)** and **MoEngage** CRM platforms to analyse customer journeys and segment performance.
- Automated analytical workflows that reduced manual reporting effort, improving team productivity.
- Collaborated with cross-functional teams to translate business requirements into analytical solutions using real production data systems.

PROJECTS

Derma Quantum – AI-Powered Skin Disease Diagnosis

Python | TensorFlow | ResNet50 | QCNN

- Developed a web-based diagnostic framework combining **ResNet50** and **Quantum Convolutional Neural Networks (QCNNs)** for accurate skin disease classification.
- Designed and trained a multi-class model on **25,000+ images across 16 disease classes**, achieving a **19% improvement** in classification accuracy over baseline.
- Improved system interpretability by 30% and code modularity by 80%, resulting in a scalable and production-ready diagnostic pipeline.

Real-Time Vehicle Counting System

Python | OpenCV | YOLO

- Built a real-time vehicle detection and counting pipeline using **YOLO**, **background subtraction**, and **contour detection**, achieving **95% accuracy** across diverse video datasets.
- Optimised processing pipeline to handle video streams at **30 FPS**, ensuring low-latency, scalable performance for traffic monitoring use cases.
- Designed modular components allowing easy integration with external traffic management systems.

EDUCATION

B.Tech – Computer Science (AI & ML Specialization)

2022 – 2025

Lakshmi Narain College of Technology, Bhopal | CGPA: 7.21

CERTIFICATIONS & ACHIEVEMENTS

- **Google Analytics Certified** – Google (2025)
- **Amazon ML Summer School** – Selected for cohort focused on Applied Machine Learning
- Built end-to-end BI dashboards integrating multiple data sources, enabling data-driven decision-making for marketing teams.
